

## Passo 2: Substituir a ação padrão de criação de Canais do Youtube Scribe

1 Click "Object Manager" ou "Gerenciador de Objetos"

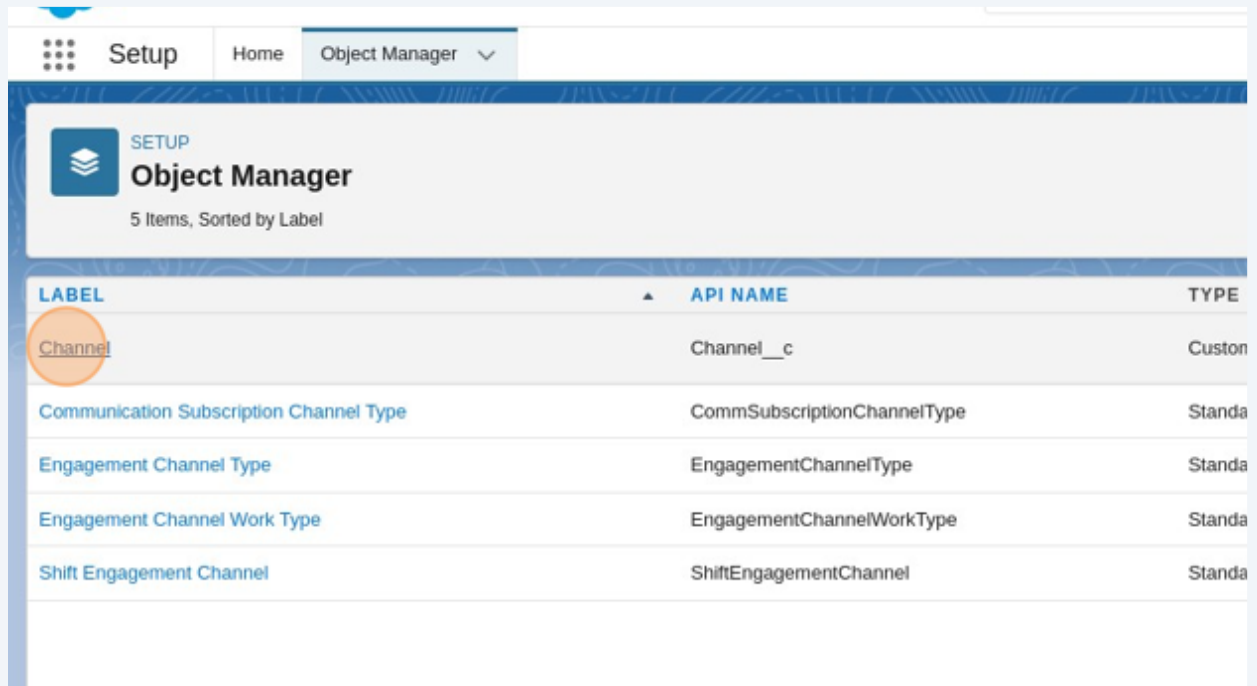

2 Click the "Quick Find"

3 Pesquise por "Channel"

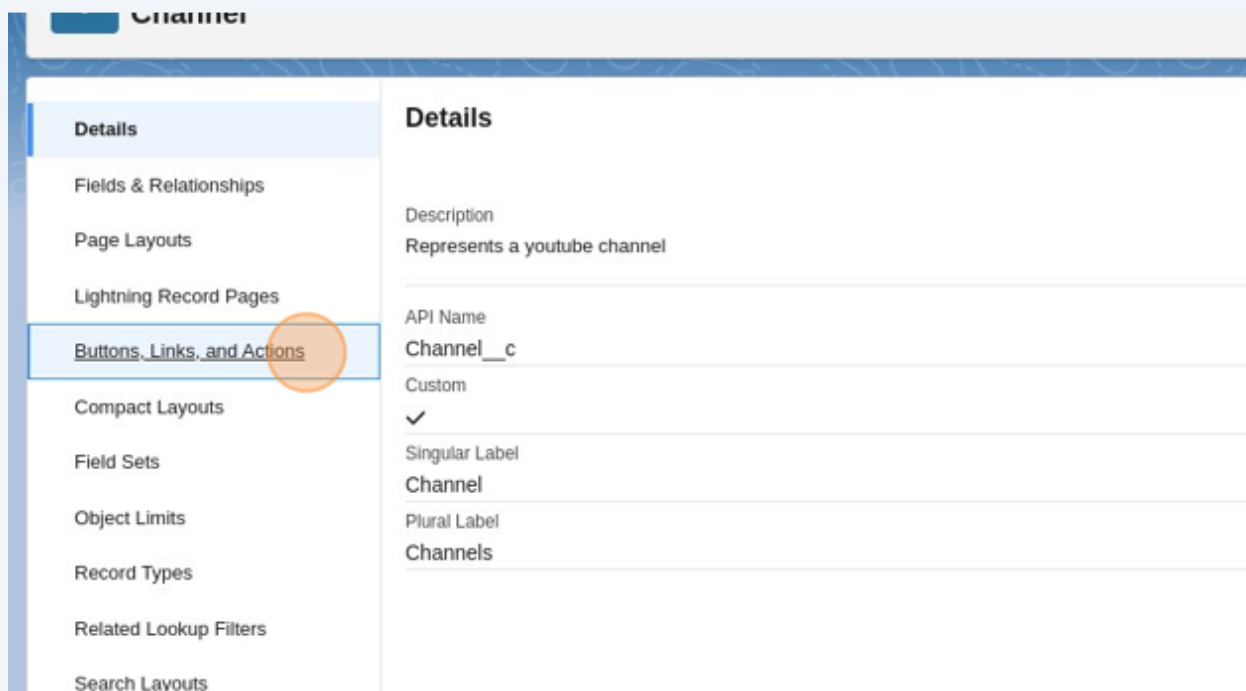

#### 4 Click "Channel"

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. The main header displays 'SETUP Object Manager' and '5 Items, Sorted by Label'. A table lists five objects, with 'Channel' highlighted by an orange circle. The table has columns for LABEL, API NAME, and TYPE.

LABEL	API NAME	TYPE
Channel	Channel__c	Custom
Communication Subscription Channel Type	CommSubscriptionChannelType	Standard
Engagement Channel Type	EngagementChannelType	Standard
Engagement Channel Work Type	EngagementChannelWorkType	Standard
Shift Engagement Channel	ShiftEngagementChannel	Standard

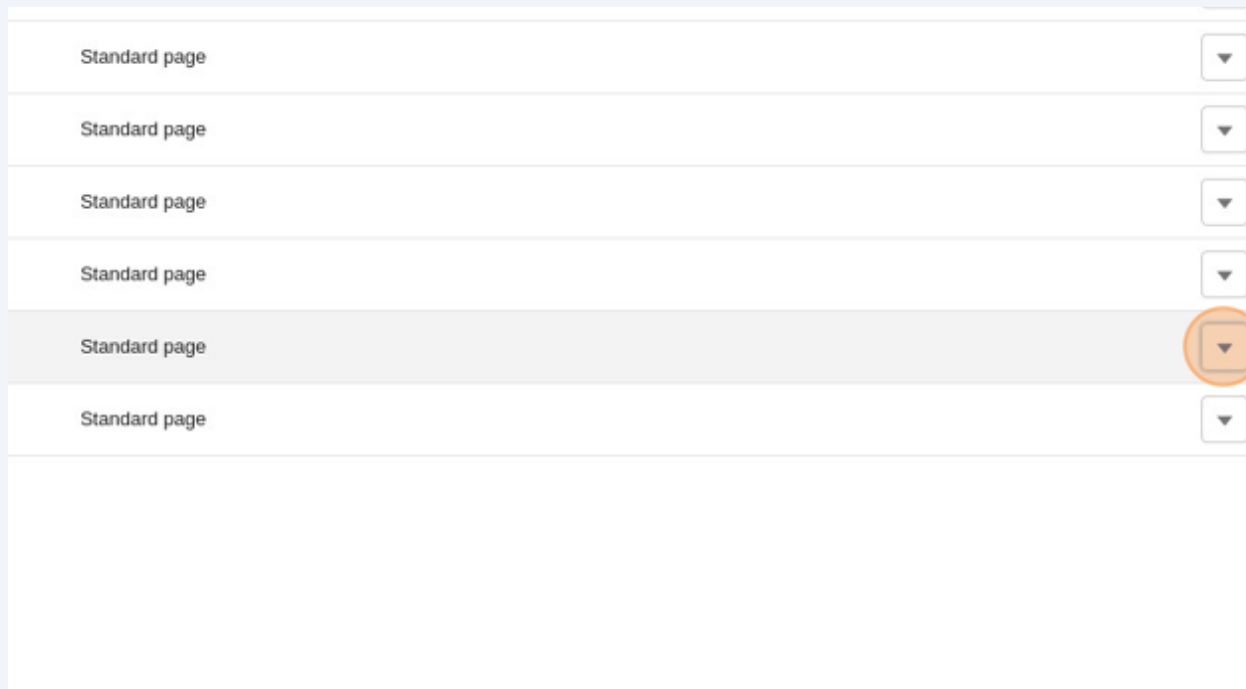

#### 5 Click "Buttons, Links, and Actions"

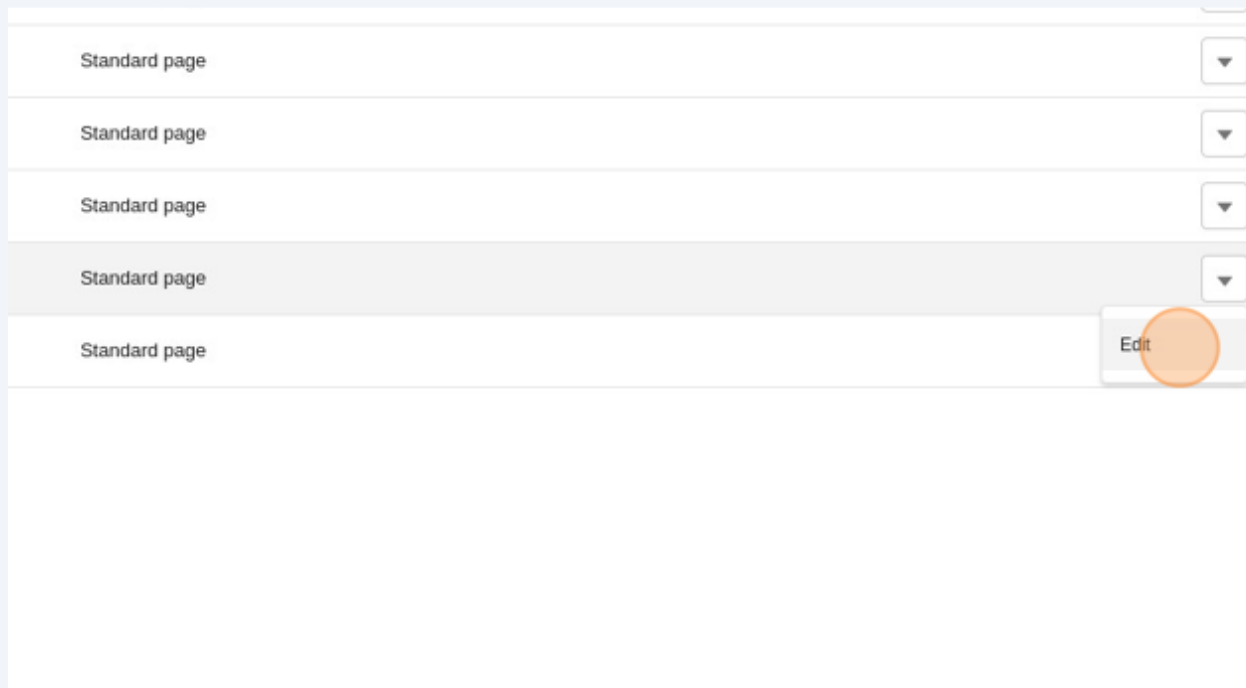

The screenshot shows the detail page for the 'Channel' object. The left sidebar contains a list of configuration options, with 'Buttons, Links, and Actions' highlighted by an orange circle. The main content area displays the details for this configuration, including a description, API name, custom status, and singular/plural labels.

Details
Description Represents a youtube channel
API Name Channel__c
Custom ✓
Singular Label Channel
Plural Label Channels

## 6 Localize a ação de "New" ou "Novo/Criar"

## 7 Click "Edit"

## 8 Seleccione "Visualforce page" ou "Página do Visualforce"

Creating a standard action or an override that requires that a user select an object for changes, instead of making a standard selection instead.

Overrides also apply to programmatic customizations of the same actions. For example, firing the View record event uses the same setting. You can set different override behavior for Salesforce Classic, Lightning Experience, and mobile.

**Override Properties** Save Cancel

	Label	New
	Name	New
	Default	Standard page

**Salesforce Classic Override**

☒ No override (use default) i

☐ Visualforce page --None-- ▼

**Lightning Experience Override**

☐ Lightning component --None-- ▼

☒ Use the Salesforce Classic override

**Mobile Override**

☐ Lightning component --None-- ▼

☒ Use the Salesforce Classic override

Save Cancel

## 9 Click no dropdown e seleccione "NewChannelPage"

also apply to programmatic customizations of the same actions. For example, firing the View record event uses the same setting, and performs the same et different override behavior for Salesforce Classic, Lightning Experience, and mobile.

**de Properties** Save Cancel

	Label	New
	Name <td>New</td>	New
	Default	Standard page

**Salesforce Classic Override**

☐ No override (use default) i

☒ Visualforce page --None-- ▼

**Lightning Experience Override**

☐ Lightning component --None-- ▼

☒ Use the Salesforce Classic override

**Mobile Override**

☐ Lightning component --None-- ▼
